Lucht Red Angus *Annual Bull Sale*

Dear Friends,

It's a great time to be in the cattle business! We hope that the high cattle prices are helping to make your ranch profitable. Thank you for your interest in our program!

This year's offering consists of 39 yearling and 46 2-year old bulls. The bulls have developed well on AminoMAX bull developer from Mountain West Ag and free choice of grass alfalfa hay. They will be ready to work when breeding season arrives. Our goal is not to have the heaviest bull, but the most prolific one with structural correctness, longevity and high libido.

Another advantage of our program is that all Lucht sale bulls have been DNA and PAP tested. Our goal is to sell functional breeding bulls ready to work for our customers.

Our sale is again 100% online this year. The response from our bull customers has been very positive. So how does this auction work? **The auction will go live via DVAuction on Wednesday, March 11th at noon and will close Saturday March 14th at 5pm.** There will be videos of the bulls available for viewing on DVAuction, and the event will run like any other online auction.

Here are some of the major benefits of having the auction online: all are aimed at helping your experience as a buyer and getting the bull(s) you are satisfied with. First, the auction will be open for 3 days so there's no hustling to get chores done or racing to beat the weather. Second, you will have ample time to log in to the auction and place your bids at your own leisure. Additionally, if you lose the bid on the animal you were after, you have plenty of time to consider your next move without trying to race the auction.

Still want to see our bulls in person before placing a bid? Not a problem. Call John (406-570-7303) and schedule a time to come by and look through the offering.

If at any time you are having trouble with accessing the auction or placing a bid, do not hesitate to give us a call. As always, we appreciate your patronage and hope you'll find this sale format to your advantage!!

Sale Order

Cattle will sell in lot order in an online auction. Please see DV Auction Bidding Instructions (posted throughout catalog).

Contact Greg Lucht (406) 570-7300

or John Lucht (406) 570-7303

for more information.

Supplemental Information

Scrotal measurements and updated EPDs will be available on sale day.

EPDs

All EPDs in the catalog are current as of 2/16/2026.

Sale Terms & Conditions

Any terms and conditions not covered by the catalog will refer to the Standard Terms & Conditions set forth by the Red Angus Association of America. Terms of the sale are cash unless other arrangements have been made.

Retained Interest

Lucht Red Angus is retaining 50% semen interest in all bulls.

Delivery

If you would like to bring your trailer to pick up you purchased bull/s, we are offering \$100 credit on every bull not delivered. If you prefer us to deliver them to you, that is also available. We deliver free for 150 miles and will start delivering bulls around April 10th. All bulls left for delivery in April will be fed for free. Lucht Red Angus will assist in making delivery arrangements at cost. All deliveries are at the buyer's risk.

Annual Bull Sale
Saturday, March 14, 2026

ONLINE ONLY! **DVAuction**
Broadcasting Real-Time Auctions

Auction opens 3/11/26 at 12 pm
and Closes 3/14/26 at 5 pm MST

Selling

32 Yearling Red Angus Bulls

24 2-Year Old Red Angus Bull

15 Black Angus Bulls &

14 Black Angus-Black/Red Angus Cross Bulls

Liability

Announcements made by the seller on sale day will take precedence on any statements in the catalog. All persons attending the sale do so at their own risk. Seller/Manager assumes no responsibility, legal or otherwise, for any accidents occurring in, on, or about the premises.

Lucht Red Angus Guarantee

All bulls that are in good breeding condition at the beginning of the first breeding season are guaranteed breeders. This does not include any injury. All claims for adjust or refund must be made within the first six months of the sale date. All bulls are guaranteed breeders; however, no guarantee is given that the semen collected from a bull will freeze.

This sale will be broadcast live on the internet.

It's been a real pleasure to work with Greg and his family at Lucht Red Angus. Greg has worked hard to instill top genetics into their herd and I think the bulls at this year's sale will show that. Mountain West Ag has been part of their nutrition program for the past several years, from heifer development to custom formulating their bull ration with our AminoMAX Bull Developer.

AminoMAX is Mountain West Ag's flagship product and has shown fantastic results in developing bulls with frame and muscle that enhance the genetic potential the Lucht's have bred into their cattle.

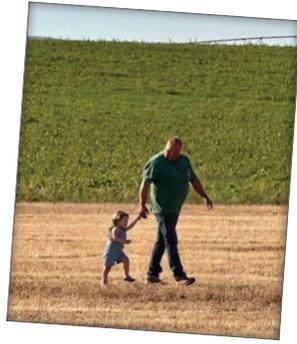

AminoMAX Bull Developer uses rolled corn to provide the proper starch levels without damaging feet while still providing good energy for gain, protected natural proteins for higher levels of by-pass, along with rumen protected amino acids and omega fatty acids to promote optimum muscle development and fertility.

MOUNTAIN WEST

AG

LEADERS IN LIVESTOCK NUTRITION

10,000 Chicks!

High Mountain Disease, or commonly known as Brisket Disease, is a very common condition seen in cattle raised in regions greater than 5000 ft. of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure. Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be “sub-clinical”, meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal’s potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the Angus breed, we can evaluate that animal’s potential to pass on genetic traits that can greatly influence the performance of that animal’s offspring. The PAP test can be influenced by several factors other than EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.

Nick Johnson, DVM

Sorensen-Intermountain Veterinary Hospital

213 Bolinger Road • Belgrade, MT 59714 • 406-388-6275 • svhlargeanimal@gmail.com • sorensenvethospital.com

Here at Lucht Red Angus, we strive to produce animals that we like to call “The Total Package”- meaning they are well balanced across the board rather than prioritizing one EPD over another.

This ensures that our animals are suitable to perform in any herd. Beyond having balanced traits, fertility is our primary criteria for culling. Nothing is worse than having a bull that wants to play pinochle instead of doing his job, or a cow that keeps pushing back her calving window. Fertility, longevity, and balance are what set our animals apart from the herd.

This Top Deal son is a stunner through and through. He's one bull we have a hard time picking out faults with. His dam is a Lokota cow, known for throwing thick, heavy calves in our herd. She's one of those low maintenance, reliable girls we can always count on to get the job done year after year, and we're confident her son will be no exception!

Now, we almost kept this bull for ourselves and we're still wondering if we made the right choice to sell him. His sire was one of our absolute favorites, who bred cows until he was 12 years old. We don't have any semen left on him, so these bulls are the last of our Clinger 2110 sons. We're calving out his daughters this year and are wildly impressed with the consistency of their conformation and udders. Don't miss out on this low birth weight, high altitude safe bull.

This Buckaroo son is the poster boy for longevity genetics. His mother is 19 this year, and expecting yet another calf! She raised this calf all on her own with no supplemental feed. This guy is an impressive testimony to her genetics, and we're confident that he will continue on that legacy with his calves.

Black Gold is easily the best Angus bull to enter our program. Beyond his physical accolades, Black Gold is among the gentlest bulls we've ever seen, and his sons inherited that attitude as well. They can be difficult to work through the pen, only because they'd rather lounge around. If you're looking for good natured black bulls, give these Black Gold sons a hard look!

PAP testing has become a crucial part of our sale process in recent years. After losing a few bull calves to brisket disease, we realized that PAP measurement is essential not only for our success but also for the success of our high-altitude customers. This test ensures that we can confidently offer our bulls to cattlemen managing some of the most challenging grazing conditions. After years of exploring outside genetics, our friends Ken and Cheri Graves of Red Fork Red Angus, took a leap of faith with our program. Their herd, running at altitudes up to 8,000 feet in Kaycee, Wyoming, benefited from our bulls, which introduced fresh genetics into a long-established, nearly closed herd. We're deeply grateful for this ongoing partnership that PAP testing has helped foster!

Foreman 10H has been such a fabulous bull for us. His gentle nature coupled with his reliability make him an easy go-to choice during breeding season. His sons have proven to carry on that legacy, and we're sure this bull will too.

Check out this boss of a bull! He was going to be in our sale last year, but was pulled due to some DNA issues. Now that he's cleared, he's ready to move on to a new herd and start breeding. His mother, 034H is a heavy hitting cow who doesn't hold back on her calves. He is a prime example of her excellence paired with the tried and true nature of our Firepower bulls.

Look at those growth numbers! They couldn't find a sire match for this guy, which is a shame, but his mother has had some impressive bulls in her short 5 years with the herd. This guy is high altitude approved and is ready to get to work!
